

DO NOT ISSUE ANY HOT WORK PERMITS UNTIL FURTHER NOTICE.

SOUTH PRODUCTION NOTES

**June 17, 2014
Midnight Shift**

**BASF EMPLOYEES
45 Last Recordable
350 Last Lost Time**

#1 MED / AI 5655 next:

Should be ready for AI 5655

Midnight shift:

Day shift: Dryer lit, 1st batch pulling up but taking long time.

Afternoon shift: Began running batches. Auger key broke late in the shift.

#1 RC / ICL-8 almost done, then AI 5655:

Done feeding the ICL-8. Just need to reverse the calciner and install the granulator, change the screener over, and set up the discharge and we will be ready to go.

Midnight shift:

Day shift: Continue last drums including 2 on pallet by #2 dryer marked "Alumina Reclaim / save for Kristen", then bring calciner down for quick reverse/install granulator, and per John Bodmann that is all the prep work for AI 5655.

Afternoon Shift: Fed the last of the ICL-8 refeed drums. Bringing calciner down in order to reverse.

Exhaust to F1 for ICL-8, then Trimer for AI 5655

#2 MED line/ Cu-0860:

On hold until more 3818 gets in pass. We are not done...just on hold until more Cu 3818 is made on #5 RC.

Midnight shift: On hold.

Day Shift: On Hold

Afternoon Shift: On hold.

#2 RC/ Cu-0860:

Make sure that we are back to temperature per MOD. Note: the fines screen was changed from a 10 mesh to 12 mesh per John Bodmann 6/13/14.

Midnight Shift:

Day shift: Refeeding (rescreening) 6 bags from lot 152 (5, 8, 13, 15, 19, 21). All were by the elevator...bring up and re-feed immediately at regular temps.

Afternoon shift: Continued the bags of refeed.

Exhaust to F1

#3 MED line / D-1798 NAQ:

Continue

Midnight Shift:

Day shift: OCS here to look at and hopefully correct/calibrate #3 station.

Continue with batches.

Afternoon Shift: Continued making batches.

#3 RC / D - 1798:

Calciner lit and coming up to temperature. Need to start feeding when up to temperature after walkthrough is performed.

Midnight shift:

Day shift: Need to remove residue bag and sand drums off of fines discharge, then set-up for D 1798. Lighting calciner afternoon shift.

Afternoon Shift: Calciner lit and should be coming up to temperature late in the shift.

Exhaust to Trimer (eventually to CTO when it is ready)

#4 RC / D-5206:

Continue to feed the remaining bags that were located in the railshed.

Midnight Shift:

Day shift: Continue

Afternoon Shift: Continued to feed. Ran into a bag where part of it was really wet....trying to nurse it through.

Exhaust to 4A DC

#5 RC / Cu-3818:

DOWN. We will only use Phibrotech copper and the material will be discharged onto a 120 bag. Knockers installed.

Midnight Shift:

Day shift: Continue

Afternoon shift: Continued to feed. Adjusting temperatures upwards to bring surface areas down.

Exhaust to 5A DC

Old Pfaudler D-0761:

Getting started as long as the water is clear.

Midnight Shift:

Day Shift: Attempted to start first batch, had water issues (discolored, rusty looking water from city water line). Issue may have been due to last week's fire and hydrant usage, and/or back flush work by Lucas. Flushed out liquid weigh tank...check water and if clear enough, make batch

Afternoon Shift: Ran water throughout shift until we got it clear. Should be able to make a batch on midnight shift.

#6 RC / SC Type G (D-0761):

Waiting on feed from the old pfaudler. Make sure to perform the calciner walkthrough before starting the feed.

Midnight shift:

Day Shift: Calciner lit...light dryer when making first batch

Afternoon shift: Held calciner. Waiting for a batch to be made on the old pfaudler.

Exhaust to Sly Scrubber

PK Blender / Na Selexorb Intermediate:

Down...A work order has been written to have maintenance evaluate PK motor on Sunday(M.V. 6/14/14)

Midnight Shift:

Day shift: No change

Afternoon shift: Waiting on maintenance.

TANK 7 / Cu 0226 solution:

MOD is in the department.

Midnight shift: Monitor tank

Day shift: Monitor tank

Afternoon Shift: Tank emptied into tote. We have enough for the last batch to be made.

New Pfaudler / Cu 0226:

Continue

Midnight shift:

Day shift: Analysis ok, starting batch #5 of 6 (batch 101)

Afternoon Shift: Batched being dried and LOD's being taken. Should be able to cool and unload on midnight shift.

Abbe Blender – D-5206:

Finished.

Midnight shift: No activity as we are out of feed.

Day shift: No activity

Afternoon Shift: No change.

National Dryer / D-5206:

Done

Midnight Shift: No activity as we are out of feed.

Day shift: No activity

Afternoon Shift: No change.

Tower 3 / Cu-0860:

Sheaves have been changed. The next load is Cu-0860. Keep a close eye on this tower. Remaining bags of Cu-0860 will have to be inspected before loading for excessive fines. Engineers are aware of this issue.

Midnight Shift:

Day shift: Bringing tower down late shift, will need to reload as described above

Afternoon shift: Had trouble starting tower. Adams cooler alarming.

Tower 6 / 930 VAM:

Loaded and running. Each tower load will take 5 super sacks filled with 8 drums.

Midnight Shift:

Day shift: Should come down beginning afternoon shift.

Afternoon shift: Tower was turned around and fired up. Currently running.

Harrop Kiln – AI-4096 XL

Continued. Use existing drums and place new labels (after old labels are peeled off) on the same spot.

Midnight Shift:

Day shift: Continue

Afternoon shift: Continued.

North Screener / DPT 101:

We need to double band all of the socks to the bins BEFORE OPENING ANY BINS – use the newly acquired adjustable quick disconnect hose clamps. Make sure that we hit the MOD rate.

Midnight shift: Hold.

Day shift: Hold

Afternoon Shift: Hold.

South Screener / Cu-0860:

We need to double band all of the socks to the bins BEFORE OPENING ANY BINS – we have now in place the newly acquired adjustable quick disconnect hose clamps. Make sure that we hit the rate required.

Midnight shift:

Day shift: Continue
Afternoon Shift: Continued.

#2662 (east) Pill Machine / Zr-0403 1/8: Hold

Started to clean up and take apart machines in preparation for Zr material. We will use only one dust collector.

Midnight shift:

Day Shift: DC's back together, reinstall machines next

Afternoon shift: Re-installing machines. Just need to do a final walkthrough and test the machines.

#2664 (west) Pill Machine / Zr-0403 1/8: Hold

Started to clean up and take apart machines in preparation for Zr material. We will use only one dust collector.

Midnight shift:

Day Shift: DC's back together, reinstall machines next

Afternoon shift: Re-installing machines. Just need to do a final walkthrough and test the machines.

TK #2 Change over to V 2010:

Just need to verify that all saggars have been changed over. We can use V 2010, AL saggars that are clean, or new saggars. Fill in work. We will be tentatively starting the week of June 23.

Midnight shift: No activity

Day Shift: No activity

Afternoon shift: No change.

Priorities

- I. Towers and screening to keep up
 - II. 5 RC to have powder for 2 line next week - SA needs to be correct
 - III. 4 RC - get rate to standard (Cu-0026 next). need to inspect and analyze lots quickly on Monday
 - IV. New Pfaudler - Finish Cu-0226, watch solution sp gr (check with Bill on metals check)
 - V. Old Pfaudler and 6 RC - get ready to run SCG with potassium
 - VI. 3 Line get D-1798 start, finish RC and start ASAP
 - VII. ICL 8 wrap and start SNAP
 - VIII. Selectsorb - need eyes on mixing to ensure PPE is correct and see what pressure buildup is
 - IX. Harrop Kiln - make sure track works correctly, no manual pushing/ pulling
- Clean National once other jobs are started - Will determine if Na Carb washing is needed after vacuuming (SNAP next)

Top three are call outs for sure, use discretion for others.

Lucas changed out the pump on the F1 Scrubber tank on 1st floor.

1. DL Page will be replacing a section of the #3 line dust collector during shut down. Ray N. project.
2. F1 Scrubber leak – need to check the suction. It may be pulling too hard allowing the water to blow through the blower. Other improvements / repairs need to be discussed for possible work over shut down.
3. Pioneer was in to take samples for Asbestos in the Truck and Tray dryers. Project quotes from other contractors underway.
4. A bag of ICL-8 out of the dryer is on hold and labeled “Hold for Kristen”.

Below are materials listed that area in Q and not acceptable to use:

Date of Receipt	Material	Material Description	Plant	Storage Location	Batch	In Quality Insp.	Base Unit of Measure	Status
6/12/2014	57350121	1-DECANOL	UXCS	0002	S0423142	317.515	KG	Waiting on COA
6/12/2014	57350121	1-DECANOL	UXCS	0002	S0423141	12,383.072	KG	Waiting on COA
3/7/2014	55500368	MAGNESIUMCHLORID X 6 H2O	UXCS	0017	OGM062413	5,669.905	KG	Missing COA - Working on getting this
6/11/2014	57350916	ALUMINA VERSAL B-II	UXCS	0002	4422001229	18,143.695	KG	Waiting on COA
